

Logeshwaran SambathKumar

Role : Technical Specialist – Performance Testing

Personal & Professional details

Role & experience

- Over 12 years of experience in Performance Testing, leading efforts across domains like Insurance, ChatBot, E-commerce, Video Conferencing, and Telecom. Proficient in tools such as JMeter, LoadRunner, LoadUI, and TestRTC, with a strong focus on identifying bottlenecks, analyzing metrics, and delivering performance insights. Skilled in creating test strategies, mentoring teams, and collaborating across teams to deliver the projects.

Education

- B.E. in Computer Science & Engineering 2012

Core competencies

Category	Skills	Exp (yrs)	Details
Vertical	Software Testing	12+	Performance Testing
Domain	Insurance, Chatbot, HealthCare, Telecom	12+	
Tools	JMeter, Load Runner, TestRTC, AppDynamics, DataDog, Grafana, Kibana	12+	
Skills	E2E Performance Testing, Java, Groovy	12+	

Certifications

Achievements

- Monthly Star Performer** – Honored for consistent delivery and leadership in performance testing.
- Client Appreciation** – Recognized for excellence in project execution and team management.

Employment

History

- Zensar Technologies (July 2025-Current), Hexaware Technologies(April 2024- July 2025), Prodapt (Mar 2023 – April 2024), Virtusa Sys India Pvt Ltd(Feb 2021 – Mar 2023), Cigniti Tech (Apr 2020 to Jan 2021), UST Global (Feb 2016 – Feb 2020) CSC India Pvt (Sep 2013 – Feb 2016)

Key projects & achievements

HealthCare Domain Project: Led the project end-to-end—from proposal phase to successful launch across two geographies (UK and Italy).

- Facilitated proposal discussions and managed key documentation.
- Directed performance testing activities including requirement analysis and test planning.
- Designed workload models using production data and ensured full test coverage.
- Delivered detailed performance reports and collaborated across teams to enhance testing standards.

Insurance Domain Expertise: Extensive hands-on experience spanning 8 years, contributing across multiple phases of performance testing.

- Spearheaded end-to-end performance testing, from planning to execution, across complex insurance platforms.
- Delivered consistent results by identifying bottlenecks, optimizing system performance, and ensuring stability under load.
- Collaborated with cross-functional and onsite teams to drive quality improvements and meet client expectations.
- Recognized for long-term contribution, technical leadership, and mentoring within the domain.

Telecom Domain Project:

- Successfully led performance testing for a large-scale Telecom application, simulating a 1.35 million user load for the UK region.
- Designed and executed high-volume test scenarios to validate system scalability and reliability.
- Delivered performance insights that supported a stable and optimized production launch.
